

Tanachod Panjapornroongrod

As a beginner developer with extensive sales experience and exceptional service work experience, I have continued to enhance my programming expertise. I believe that a successful developer should excel not only in coding but also in providing outstanding service, communicating effectively, and managing mistakes adeptly. These attributes, which I possess, are crucial for delivering a superior user experience.

As a fresh developer with determination.
I'm eager to join your company!

EDUCATION

B.Sc. (Computer Science)
Sukhothai Thammathirat (STOU)
Studying in the 4th year

SKILLS

- **Android Studio**
 - Android Native App.
 - Kotlin, Javascript
 - Firebase, MongoDB
 - UI & UX
- **Visual Studio Code**
 - NodeJS, API
 - React Hybrid App.
 - Typescripts
- **Website**
 - Java Dynamic Web
 - Servlet, JSP
 - HTML, CSS
- **Database**
 - MySQL
 - SQLite
 - Google Firebase

ACADEMIC HISTORY

Android native application

4th academic year / 2024

Grade: A+

By Android Studio

Developed an app summarizing content and lessons, including important functions and features such as Kotlin language, various navigation patterns, using Intent and Bundle, UI and UX design, Connectivity, JSON, AsyncTask, RecyclerView, SQLite database, Realtime Firebase, File & Cache, Location, Google Map, Camera and Sensors, Services (Foreground, Background) along with BroadcastReceiver, using NotificationWorker for notifications, basic GitHub, and OpenChat app with a notification system inspired by the Line Application.

React hybrid application

4th academic year / 2024

Received CERT

By Visual Studio Code

Participated in the "Department of Skill Development" Training Program: Completed a course on "Mobile Application Development on Mobile Operating Systems," focusing on creating hybrid apps with TypeScript, developing company employee care apps, using Node.js to create APIs for NoSQL databases, and basic MongoDB. The course also covered libraries such as zod, zod-resolver, redux, react-hook-form, and JSON fetch.

Java Dynamic Web (Servlet)

3th academic year / 2023

Grade: A+

By Eclipse

Developed a school website for student registration and created a system for staff to add courses, including an admin interface for managing database connections via SQL through Servlet API using Java, JavaScript, JSP, HTML, CSS, and AJAX. Additionally, implemented OpenChat for community discussions, welcoming new students, and academic exchanges on the website.

MySQL, ER-Diagram

2th academic year / 2022

Grade: A+

By XAMPP and MySQL Workbench

Initiated by analyzing project data for an employee placement company, focusing on storing job search histories and applicant profiles. Designed ER diagrams illustrating entities and relationships of the data, followed by normalization. Utilized these diagrams as a template to write SQL code for database creation without GUI.
